

New Pandemic Safety Protocols Now in Place

Rinn ABA
Working to Keep Your Family **Safe**
and Your Child Learning

The extra safety measures we've taken

1

One Instructor per Household

This minimizes potential spread if someone becomes sick

BCBA Supervision via Telehealth

Video-based BCBA supervision minimizes the potential for transmission across households

Face Covering Required for All Adults

Face masks or face shields for all instructors, BCBAs, and parents in the instruction / work area minimize the risk of cross-contamination

Students Learn to Wear Masks

Our systematic teaching approach helps students learn to wear masks and tolerate those worn by others

Materials and Work Area are Sanitized Regularly

Our staff sanitizes materials and the work area throughout each session

Hand Washing

Instructors, BCBAs and students sanitize their hands repeatedly throughout each session and each time there is a cough or sneeze

Outdoor Locations

Outdoor locations are used as much as possible

Daily Attestation

Instructors and parents attest to taking CDC recommended precautions when not in session

Transparency and Acceptance

If an instructor or client lives with a high-risk person such as an ER doctor, nursing home aide or similar, Rinn and the other party must be aware and accepting

Faster Learning, Fewer Tears, a Brighter Future!
